Purchase Order Receiving and Payments Quick Guide

After a Receipt is created for a dispatched Purchase Order and an <u>Invoice</u> is received by <u>Accounts Payable</u>, a Payment will be sent to the Supplier. If a Receipt is not entered and/or an Invoice is not submitted, the Supplier will not be paid - even if the PO goods/services were provided.

Do not create a Receipt for an item that needs to be exchanged or returned. For guidance, click here.

Accounts Payable refers to this as the three-way matching process.

Additional information on the receiving and payment process can be found here.

Requesters can view this activity for their purchases via their Manage Requisitions tile.
